Multifunction Climate Control™
hydronic controller

Effortless, intelligent control.
That's Uponor Logic at work.

RADIANT HEATING AND
COOLING SYSTEMS

The new Multifunction Climate Cŏntrol System does the job of six controllers.

- Eliminates the need for multiple controls
- Increases functionality without adding cost
- Simple plug-and-play connections, eliminating wiring confusion
- Low-voltage platform (24V)
- One controller can control multiple proPANEL® units, decreasing product and installation costs
- Fewer replacement parts
- Intuitive 5-button interface for easy setup and viewing
- Fully programmable with multiple built-in functions
- Cat5 connections and wires

Now one control can support multiple functions with plug-and-play simplicity.

Introducing the new Uponor Multifunction Climate Cŏntrol™ System.

Simple, intelligent and intuitive, the Multifunction Climate Cŏntrol hydronic controller is designed to do everything better. It replaces all six of our previous pro Series models, and is made to run multiple proPANEL pumping and mixing units with incredible ease. A single device now performs multiple functions, like domestic hot water (DHW) control, mixing, snow melt and more. It's one box, with one wiring schematic, one setup and one easy, plug-and-play way to install.

Drastically reduced installation times.

We've replaced conventional thinking with something we call Uponor Logic. That means the new Multifunction Climate Cŏntrol hydronic controller has been completely re-engineered to be simplified, streamlined and intuitive. With Cat5 wiring, instead of multi-strand thermostat wire, and a portable data stick that stores upgrades and system configurations, installation and setup can be done in a fraction of the time it used to take.

Less expensive, because one unit does it all.

One multifunction control is better than a multitude of old-fashioned controls because it's one simple installation, reduced materials and labor costs, even fewer replacement parts. A single Multifunction Climate Cŏntrol hydronic controller can be used for:

- Zone pumping
- Boiler control
- Multiple water temperatures
- Snow melting (semiautomatic and fully-automatic)
- Single or multiple mixing
- Boiler staging
- Domestic hot water (with or without priority)

Uponor Logic. Also known as peace of mind.

Uponor Logic is a unique approach to analyzing problems and providing solutions. It's our comprehensive analysis, stringent engineering and rigorous testing that ensures our products and systems are the best, most reliable, intuitive and intelligent available today.

- Uponor is a leading international supplier of radiant heating, plumbing and fire safety systems.
- With more than 30 years of proven performance, Uponor delivers comfort and peace of mind to millions of homeowners in 100 countries around the world.
- We believe in sustainable building and use materials, practices and packaging that are designed to minimize our impact on the environment.

For more in-depth information about the new Multifunction Climate Cŏntrol hydronic controller, call us at 800-321-4739 or visit **www.uponor-usa.com** (U.S.) or **www.uponor.ca** (Canada).

One Multifunction Climate Cŏntrol hydronic controller manages multiple proPANEL pumping and mixing units with incredible ease.

Easy to read 5-button interface.
