

Retire the pipe wrench.

Our plumbing just plain works better. It resists freezing and cold-water condensation. And it's quiet. No water hammer. No singing pipes. The tubing even muffles the sound of rushing water.

Strong and silent, Uponor PEX plumbing comes with a 25-year guarantee when installed by one of our specially trained professionals. We fully expect it to last a century.

If you pause to think carefully about your plumbing now, you'll think of it fondly for a lifetime. Ask your builder about Uponor PEX plumbing, or visit www.uponor-usa.com.

But the real beauty
is hidden behind the wall.

The chrome gleams.

The porcelain glistens.

The water sparkles.

Is it possible for plumbing to be beautiful? Uponor PEX plumbing systems show emphatically that it is.

Long-lasting.

Won't corrode like old-fashioned copper pipes.
Expect it to last at least 100 years.

Leak-resistant.

ProPEX® fittings assure tight seals and no soldered joints or messy solvents.

Clean.

Does not corrode and is not affected by corrosive water and soil.

Quiet.

No water hammer or singing pipes.
It even muffles the sound of rushing water.

Proven.

With decades of testing, more than 12 billion feet of Uponor PEX tubing circles the globe.

Guaranteed.

Comes with a 25-year limited warranty when installed by an Uponor-trained professional.

It's not just about how things look.

When building or rebuilding your home, there's so much to think about. Brass or chrome? Should it be Mediterranean Blue or Caribbean Blue?

But nobody thinks about the plumbing. At Uponor, we hope to change that. You need to think about how things work. That can be beautiful, too.

Uponor PEX plumbing systems—good ideas in circulation.

Uponor PEX tubing is the most thoroughly tested PEX in the world. Our PEX tubing is still going strong after more than three decades of testing under extreme conditions at an independent laboratory. This is the longest continuous test known to exist on any tubing material. Our reputation for quality, testing and installer training assures you're getting the finest, most maintenance-free plumbing system available.

But there's more to being the leader in PEX plumbing. We can also help save energy, water and money with our ingenious optional feature called the D'MAND® Hot Water System. Homeowners activate the system with a push button or motion sensor located by each fixture. It's smart electronics that can sense when you enter a room and begins circulating hot water from your heater. That way, hot water is ready almost from the moment you turn it on. No water gushes away unused while you wait.

Better in every way.

PEX, as in PEX tubing, is short for cross-linked polyethylene. It's tough, yet flexible. It resists corrosion and scaling. It endures ferocious heat and bitter cold. It's extremely durable, even in the harshest water conditions.

With our uniquely designed ProPEX fittings and reliable PEX tubing, the whole system assures homeowners of the finest, most maintenance-free plumbing systems available anywhere.

Feature	Copper	PEX Tubing
